Alert block

This is an alert block.

Replace commands

A. Using only command:

Replace commands

A. Using only command:

Hello, only command has been applied to me.

Replace commands

A. Using only command:

I am similar to visible command but I don't take up additional space

Replace commands

A. Using only command:

For example: Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

Replace commands

A. Using only command:

Next commands to be explored are visible and invisible commands:

Replace commands

A. Using only command:

Done.

B. Using visible and invisible command

Replace commands

A. Using only command:

Done.

B. Using visible and invisible command

Hello, visible command has been applied to me. I will be invisible after 1 skip

Replace commands

A. Using only command:

Done.

B. Using visible and invisible command

As you can see, previous text disappeared but it still takes up the space given to it.

Replace commands

A. Using only command:

Done.

B. Using visible and invisible command

As you can see, previous text disappeared but it still takes up the space given to it.

In this way, visible is different than only.

Replace commands

A. Using only command:

Done.

B. Using visible and invisible command

As you can see, previous text disappeared but it still takes up the space given to it.

In this way, visible is different than only.

In the next slide we will see the Usage of Highlighting.

Highlighting commands

• The command alert has been applied to the word Highlighted .

Highlighting commands

- The command alert has been applied to the word Highlighted .
- We can also use normal color command to highlight.

Highlighting commands

- The command alert has been applied to the word Highlighted .
- We can also use normal color command to highlight.
- This way we can customise alerts with any colours, be it Blue, Green or any colour.

Alert!

Sometimes alertblock is used instead of alert command.

Highlighting commands

- The command alert has been applied to the word Highlighted .
- We can also use normal color command to highlight.
- This way we can customise alerts with any colours, be it Blue, Green or any colour.

Alert!

Sometimes alertblock is used instead of alert command.

Usage of Overlays

Highlighting commands

- The command alert has been applied to the word Highlighted .
- We can also use normal color command to highlight.
- This way we can customise alerts with any colours, be it Blue, Green or any colour.

Alert!

Sometimes alertblock is used instead of alert command.

Usage of Hyperlinks

- In this slide we see inclusion of hyperlinks
- This link leads to IIT Dharwad website.
- We could also use url command if no url description is needed.
- www.iitdh.ac.in
- Hyperlinks can be used to go to different slides like following.

```

```

Usage of Structures

Columns and blocks

In this slide we see usage of columns and blocks

- This is the first of the three columns present
- Any column can contain any sort of content.
- 2nd column contains blocks.
- 3rd column contains an image.

Block

This is a sample block inside a column.

Alert Block

This is an alert block inside a column.

Further slides include concepts which have been covered already in LATEX assignment.

Figures and Tables

Figures: Figures have been used throughout the document. For example this slide.

Tables: Following are some tables with multirows and multicolumns.

Figures and Tables

Figures: Figures have been used throughout the document. For example this slide.

Tables: Following are some tables with multirows and multicolumns.

	Countries				
Year	India	Afghanistan	Bangladesh		
2000	1.8	1.9	1.4		
2005	1.5	1.9	1.4		
2006	1.4	2.0	1.3		
2007	1.5	2.0	1.3		
2008	1.4	2.0	1.3		
2009	1.4	2.0	1.3		

Continuation of tables, Transitions

Nested multicol-multirow				В			
Nested multicol-multinow			С	D			
Е	F	multicol					
G							

Transitions: Many of the slides have transitions attached to them.

In the next slide we have Mathematics section.

Theorem 1

If q^2 is divisible by 3, so is q.

Theorem 2

 $\sqrt{3}$ is irrational.

Proof.

Suppose not; i.e., suppose $\sqrt{3} \in \mathbb{Q}$. Then \exists m,n $\in \mathbb{Z}$ with m and n relatively prime and $\sqrt{3} = \frac{m}{n}$. Then $3n^2 = m^2$. Thus m^2 is divisible by 3 so by Theorem 1 ,m is also.

Theorem 1

If q^2 is divisible by 3, so is q.

Theorem 2

 $\sqrt{3}$ is irrational.

Proof.

Suppose not; i.e., suppose $\sqrt{3} \in \mathbb{Q}$. Then \exists m,n $\in \mathbb{Z}$ with m and n relatively prime and $\sqrt{3} = \frac{m}{n}$. Then $3n^2 = m^2$. Thus m^2 is divisible by 3 so by Theorem 1 ,m is also.

By definition,m = 3k for some $k \in \mathbb{Z}$. Hence $m^2 = 9k^2 = 3n^2$ and so $3k^2 = n^2$. Thus n^2 is divisible by 3 and again by Theorem 1,n is also divisible by 3. But m,n are relatively prime, a contradiction. Thus $\sqrt{3} \notin \mathbb{Q}$.

Multiline equation (with step viewing)

$$\cos 2\theta =$$

Multiline equation (with step viewing)

$$\cos 2\theta = \cos^2 \theta - \sin^2 \theta$$

Multiline equation (with step viewing)

$$\cos 2\theta = \cos^2 \theta - \sin^2 \theta$$
$$= 2\cos^2 \theta - 1$$

Multiline equation (with step viewing)

$$\cos 2\theta = \cos^2 \theta - \sin^2 \theta$$
$$= 2\cos^2 \theta - 1$$
$$= 1 - 2\sin^2 \theta$$

Next slide shows explicit use of lists with step viewing
